

# valor SMARTFIRE SYSTEM

LUXURY. EFFICIENCY. QUALITY. CONVENIENCE. HEAT.

### SMART HEAT

Our direct-vent, sealed combustion gas fireplace eliminates any unwanted drafts and heat loss.

### SMART INVESTMENT

Add to the resale value of your home by installing a Valor gas fireplace.

### SMART SAFETY

Engineered to provide peace of mind, all Valor products undergo extensive safety testing.

### SMART BURNER

Valor's self-modulating system uses less energy to produce a hotter and better looking fire.

### SMART CONTROL

The remote pilot ignition system allows you to turn the pilot light ON & OFF, saving fuel and money when the fireplace is not in use.

### SMART POWER

Save energy. Valor fireplaces do not require electricity to heat your home.

### SMART SAVINGS

Valor zone heating is proven to save money by providing a steady, even heat in the rooms you use the most.

### SMART DESIGN

With over 100 years in the fireplace industry, Valor takes pride in continually producing unique, high-quality products.

## SMARTFIRE offers HEAT MANAGEMENT

### PROGRAMMABLE THERMOSTAT:

The ValorStat operates with your comfort in mind. Your Valor can be set to maintain a steady temperature or to be turned on and off in tune with your daily schedule. It can also provide backup heat for your home while you are away.

### LOW TURNDOWN:

The Ventana has a 60% turndown that provides a wide range of heat. A gentle flame to enjoy an evening of relaxation or a roaring fire to restore warmth after a long winters day.

### NO POWER, NO PROBLEM:

Valor gas fireplaces are fully functional heaters that don't rely on electricity or fans to heat. During power outages, your Valor can maintain a constant level of comfort and safety for your family.

### SCREEN DOORS:

The Ventana screen door systems provide a secondary layer to soften the radiant heat output. The screens also act as a safe guard for your family.

now, that's SMART.

## How does Radiant Heat work?

Radiant heat is commonly known as the most efficient, comfortable, healthiest and most natural form of heat. In fact, the ultimate radiant heater is the sun.

Warmth felt from sun rays is not warm air but actually infrared "radiant" energy. Valor fireplaces are famous for producing high levels of radiant heat in addition to hot convected air from aluminized steel heat exchangers. It's the radiant energy that achieves the comfort level that your central forced air system will never attain.

Like the sun, radiant heat moves in straight lines, warming all objects in its path. These objects act as small heat converters, reflecting their own gentle heat and replacing any heat lost to cold objects such as walls and windows.

Radiant heat doesn't just warm the air - it warms walls, floors, furniture and people!
