## Introducing Valor's Classic Arch

Arched cast-iron fireplaces have graced countless fine homes since their introduction in the 19th century. It is an enduring architectural form that is hard to match for well proportioned elegance.

Our new Classic Arch is a more contemporary version with clean lines in bold, yet tasteful, polished iron.

Like our best-selling Windsor Arch, the new Classic Arch is powered by our refined Portrait Series engine. Offering numerous installation possibilities, including built-in zero clearance or insert applications, you can install this fireplace just about anywhere in your home.

This energy efficient zone heating system ensures that the Classic Arch will pay dividends in stylish comfort for many years to come.

## ValorStat™ plus

This unique programmable remote lets you control your fireplace in 3 ways.

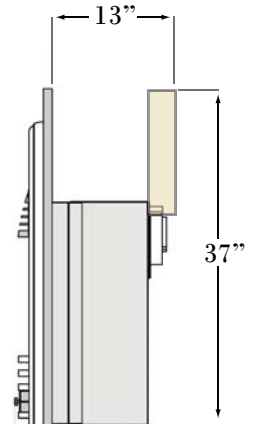

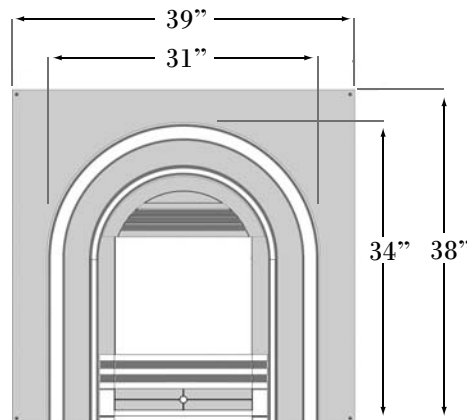

- 1 Manually adjust your flame height up or down.
- 2 Set a time and temperature to turn your fireplaces on & off. Let it wake up before you do!
- 3 Use the automatic mode to adjust your fire up or down to maintain the room temperature that you set.
